VWork
— Simon Pengelly

Description

VWork is an award-winning collection of wooden tables, desks, high tables, meeting tables and benches. Carrying forward the distinctive V joinery detail of its forerunner, the VTable, VWork brings a gentler, more domestic aesthetic to workplace environments without compromising on functionality. Choose between stand-alone or modular desks and tables with integrated power and cable management. Hot desks, meeting tables and high tables have optional power accessed via a central cut out, desks have cable management and front mounted power accessed via a flip down lid. Complementary benches, with a choice of wooden or upholstered seats, and fabric and wooden screens complete the collection. Available in a natural or black oak finish with beautifully crafted, solid oak legs and oak veneer tops, VWork has been designed to work around its user, creating a gentler, more flexible and less prescriptive work space.

Materials

Top	FSC™ certified lacquered oak veneer on MDF with solid oak edging
Legs/ Frame	FSC certified solid oak matt lacquered
Lid	Machined solid oak with a matt lacquer finish

 Packed dims (mm) 700 x 310 x 420

Designer
— Simon Pengelly

'I started making furniture in my father's workshop when I was eight, going on to win national competitions for cabinet making. The practical experience and an affinity with materials and processes, gained from an early age, are central to my design work and service.'

Understanding materials and manufacturing techniques is fundamental to my approach, combined with a passionate desire to create accessible production furniture with 'soul'. Understanding manufacturing culture and possessing knowledge of these companies markets is the only way to effectively work with manufacturers.'

Maintenance

Tables require regular, light dusting with a soft cloth or brush. Spills should be wiped as soon as possible and marks may be removed with warm soapy water and a gentle rub. Avoid acids, bleaches and furniture polishes containing silicones. The water-based lacquer that we use is highly resistant to the rigours of everyday life but, like traditional solvent-based finishes, will scratch if abrasive materials are used.

Environmental Information

Our mission is simple, to create furniture of the highest standards in terms of design, quality and durability that enriches life today without compromising tomorrow. Our products are thoughtfully manufactured in the UK with respect for environmental limits and an understanding of the interconnectedness of a healthy economy, society and environment.

VWork is crafted from FSC certified solid and veneered oak on MDF, cut using renewable energy in our Somerset factory and finished in an EU Ecolabel approved, low VOC emitting, water-based lacquer. All foam is CertiPUR certified.

Certification

VWork is CertiPUR certified and available with FSC certification on request.

Material Content*

■ - MDF	44.21kg (57.8%)
■ - Solid Oak	28.40kg (37.1%)
■ - Steel	2.75kg (3.6%)
■ - Lacquer	0.51kg (0.7%)
■ - Oak Veneer	0.45kg (0.6%)
■ - Polyester	0.11kg (0.1%)
■ - HDPE	0.05kg (0.1%)

*Weights and material percentages have been calculated using VWO004

Recycled Content

2.1%

Pre Consumer Recycled Content

1.2%

Recyclable Content

41.5%

Post Consumer Recycled Content

0.9%

*Although reusable, MDF is not recyclable, therefore, Stripey shows as having a low recyclable content. At end of life, the MDF may be used for energy recovery until a suitable recycling infrastructure for MDF is established.

Sustainability

Approach

We take a broad and holistic approach to sustainability, considering every aspect of a product's footprint from embodied carbon, to wider impacts on ecosystems and society. Our Sustainability Policy, which can be seen on our website, targets seven key areas: Co2 emissions, resource use and protection of habitat and biodiversity, production of waste, VOC emissions and harmful substances, plastic footprint, ethical purchasing and a corporate social responsibility programme that has a particular focus on the designers of the future.

Our furniture is hand crafted in Somerset using 100% renewable energy. We are a Carbon Neutral Plus organisation.

Our products can help gain credits under environmental assessments such as WELL, BREEAM, LEED and SKA rating, speak to our team about your sustainability goals at sustainability@modusfurniture.co.uk

Design

We take a circular approach to product design, designing furniture that lasts and can easily be repaired and disassembled for multiple lives in use. At end of life, our furniture may be taken back for remanufacture and given a new lease of life. Materials and processes are carefully considered so that we can manufacture products with the lightest footprints.

Materials

Dematerialisation is a key consideration, we aim to create the best products from the fewest resources, using renewable materials or materials that are part of a continuous loop. We rigorously design out waste and limit and avoid the use of potentially harmful substances and the creation of VOC emissions, keeping our products as healthy as possible. We use CertiPUR certified foam and EU Ecolabel approved, low VOC emitting, water-based lacquers. We hold FSC chain of custody certification and can offer over 90% of our products with FSC certification. We aim to use materials with the highest recycled content and those that can be readily recycled.

Production

All upholstery and joinery is manufactured in our Somerset factory using 100% renewable energy. Manufacturing in-house helps keep furniture miles to a minimum. We use a combination of digital technology and hand-crafted techniques to produce durable furniture of the highest quality.

For every ten products we pledge to plant a tree, reforesting once forested land with native, broadleaved species at our factory site in South Somerset and in our local area as part of our ReForest scheme, which will provide biodiverse habitats where wildlife can thrive, and capture carbon for years to come.

Packaging & Distribution

We aim to keep our plastic footprint to an absolute minimum across all operations of our business. Our most significant area of impact is packaging. We are phasing out all plastic that cannot be recycled, gradually replacing plastics with bio-based, compostable alternatives. If you would like your order delivered packaging free please talk to our team.

We are yet to transition to an all-electric fleet, until then we aim to minimise delivery miles by careful planning and we are choosing to offset these emissions with reforestation projects that are verified to the PAS 2060 standard.

Life in Use

We view our products as material banks for the future and would like to see them used over multiple lifetimes before being stripped into their individual materials for recycling. This means that we offer replacement parts wherever possible, including zip off fabric covers which may be bought separately. If you have any damaged part please take a photo of it and contact us to arrange a replacement.

End of Life & Producer Responsibility

In our journey towards a circular economy we have established an in-house remanufacturing centre, ReWork. If you have some of our products that you no longer use, please contact us to arrange collection and we will remanufacture each piece, retaining maximum value from every part.

Community & Society

We think carefully about whom and where we buy, and have a clear ethical purchasing policy in line with the ETI and UN Global Compact.

We carefully consider how we can benefit our local community and we have close links with local schools and colleges, donating scrap wood, board and fabric to the Design & Technology departments of three local schools and sponsoring Art & Design awards, young enterprise schemes and local arts organisations. We have active apprenticeship schemes, offer work experience placements and paid internships. We are proud to be an Accredited Living Wage Employer.

Sustainably Made in our Somerset factory

All upholstery and joinery is manufactured using 100% renewable energy. Manufacturing in-house helps keep furniture miles to a minimum. We use a combination of digital technology and hand-crafted techniques to produce durable furniture of the highest quality.
