
Hold

Jonathan Prestwich

Technical

With a choice of three bases; solid ash legs with powder coated steel plate, a cast aluminium swivel base on glides or a swivel base on castors, Hold is an exceptionally versatile chair suitable for a multitude of uses from meeting room to restaurant. Upholstered over a pressed ply shell with integral arm rests, Hold was inspired by today's flexible working culture, the growth of the third space and impromptu collaborations. As is characteristic of every Jonathan Prestwich design, Hold is a direct response to the user's habits, practices and movements, designed to support individuals as they turn in their seat in today's collaborative world.
